Building Bridges to a Brighter Future

B Brave Foundation is committed to improving the lives of children with rare incurable neurological disorders. We accomplish our mission through our direct efforts with key stakeholders:

- **We advocate for affected children,** and the best possible quality of life.
- **We support families** to ease financial stress, cope with incredible emotional challenges and enhance the quality and quantity of time they have with their children.
- **We work closely with healthcare providers,** striving to find tools and tactics that reduce unnecessary suffering and allow them to face the unusual challenge of incurable pediatric illness with grace and honesty.

Our Story

The B Brave Foundation was born out of love. When Sara and Sam Scaparotti lost their son Josiah (Joey) to infantile GM-1, an incurable neurodegenerative disorder, they channeled their experience into a foundation to help children, families and caregivers facing what they did with their own son. The B Brave Foundation is a community of bridge builders that strives to reduce unnecessary suffering, ease burdens and find new paths. We support families financially and emotionally and partner with healthcare providers to explore alternative care models for children affected by devastating childhood diseases.
